

CUSTOM DISPLAY DESIGNS

Your imagination is the limit..

to how we can help you with your displays. We have a wide variety of products and an expert staff to help create realistic features to meet your needs.

Artificial Bark & Custom Trees- Our flexible sheets of bark are available in over 15 different types and sizes, all replicated from real trees to capture all nature's details. If you aren't interested in building a tree yourself we can build them to your specifications.

Stone Textures- Like the bark, our textures are taken from actual walls, and represent the details and depth of the real thing.

Panels are lightweight, easy to work with, and available in sizes ranging from 4'x 8' to 4'x16'.

Rock & Waterfalls- Replications Unlimited has several different rock textures available to work with to form realistic lightweight features.

Theming & Sculptures- Whether carving wall panels, snowbanks or larger-than-life gears, we can create a prop or whole themed environment for your store, tradeshow booth, or exhibit.
