## CUSTOM BUILT GROTTO AND WATERFEATURES

# OUR ADVANTAGE

Replications Unlimited custom builds life-like rock grotto formations to the exact size and dimensions of your needs. Our prefabricated waterfalls are made in our factory and are designed to mount to the existing decking so that no extra foundation support is required for installation. Unlike many of our competitor's products, our grottos aren't carved or sculpted. The grottos are made using our unique URESTONE rock technology that allows us to replicate the exact texture and details of real rock.

### KEY FEATURES:

- Custom units are factory built in modular sections
- Shipped ready for quick installation
- High performance synthetic composite & coloring system
- Ability to integrate grotto texture and color with real rock
- Large spans available
- Freeze/Thaw Resistant
- Midwest & west coast facilities

## THE DESIGN PHASE

It all starts with the design. We work with you and/or your contractor to help create look and feel that you have been dreaming of. This phase is based on systematic 4 step process.

## CHOOSE THE CONFIGURATION

There are several decisions that need to be made in determining how the grotto will look. First, it needs to be determined whether the grotto will be built over a swim-out or a spa. Secondly, we need to know the height of the grotto.

### SWIM OUT

### SPA

## COLOR CHOICES

Our Rock

We offer a wide range of colors and the ability to closely match coloring of surround rocks or elements.

Real Rock

Our Rock

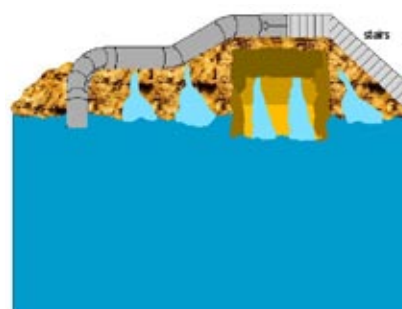

## COMPLIMENTARY ROCKS & WATER FEATURES

Add to the overall appearance of the grotto by adding other waterfalls and rock features. Visit [www.ultimatepools-capes.com/poolwaterfalls.htm](http://www.ultimatepools-capes.com/poolwaterfalls.htm) to view our standard waterfall series.

## FINAL LAYOUT

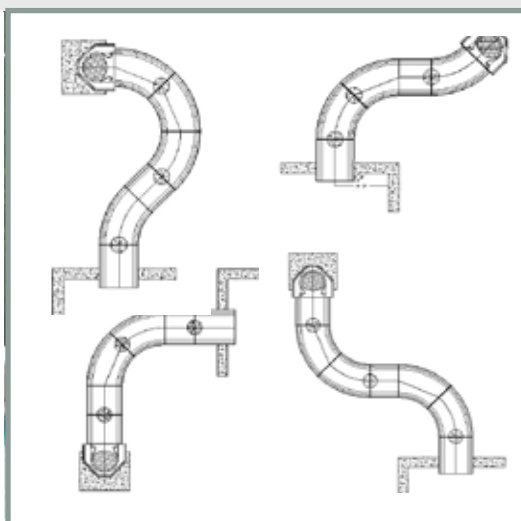

Once all of the elements have been determined, we will provide a color drawing of the design and an optional clay model can be provided

## WATERSLIDE DESIGN

## TYPICAL SLIDE OPTIONS

## THE INSTALLATION PROCESS

How easy is it to install our features? Typically installation using real rock can take weeks and lots of man hours to complete. Since our features are built pre-plumbed and in modular sections, installation generally takes only a couple of days. The whole process is as simple as moving the sections into place

There are numerous standard slide configurations and an infinite amount of custom options available. Once a general height and shape has been chosen, Replications Unlimited will integrate the waterslide into a final rockscape design. Minor changes in the design may be necessary to insure that the rockcape and waterslide fit into the pool and shape.
