

# REPLICATED REPORT

## MARKETING NEWSLETTER: VOLUME ONE 2006

This is Replications Unlimited's first of many newsletters to highlight new products, advise of latest promotions, explain our technology or our quality control process and bring you a story on one of our custom applications!

### NEW PRODUCTS

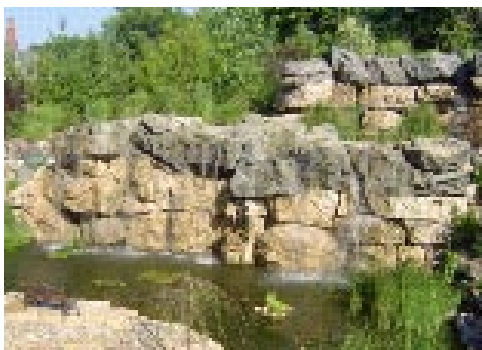

The Sierra Falls is the newest Waterfall in our line. It has a beautiful gentle flow that cascades down 3 levels into an existing or newly created pond. The product is medium in size with dimensions of 25" high, 46" wide and 34" deep. It weighs only 40 Lbs. The Waterfall uses a 500 -700 gph pump and like all our falls, only takes minutes to set-up. Available in 4 colors. This product will be a standard product.

### NEW PROMOTIONS

We are selling complete "kits" for any of our Waterfall Products. The kits include the appropriate size pump with the proper fittings and hose to give the customer everything they need to set-up their systems in just minutes. This eliminates the need for your customers to search for parts at competing hardware stores. Pump sizes start at 500 gph and go as high as 3,800 gph, and are available for the waterfall shown above. Brand and warranties vary according to manufacturer.

### CUSTOM PROJECTS

The photo at the left is a custom Waterfall with Landscape Rocks prepared for a large pond installation. These rocks are part of our "stackable" rock series. This 2 story rock feature has 3 levels of ponds with built-in hoses to direct water to pre-selected areas. The process took just one day to install due our "pre-engineered" factory built design. The rocks are first set-up at our facility and then shipped to the job site with simple installation instructions. This eliminates last minute jobsite headaches and mistakes.

### GENERAL NEWS

Replications Unlimited, LLC. is now offering marketing support tools on request. We offer banners, trifold brochures for countertop hand outs to your customers (or for your own regional mailings), colored sample chips and many other exciting support programs. Please call us on how we can assist you in promoting our line that has the longest success of field history and the highest quality resins of any competing products in the industry.

See upcoming Newsletters for further details of our exciting projects and new products available.
