

REPLICATED REPORT

POOL NEWSLETTER: 2008 VOLUME I

This Newsletter highlights our exciting new products that we are offering this year.

NEW 2008 LEDGESTONE WATER FEATURE

RU has recently developed a new series of Ledge Stone style water features that are new for 2008. This series has been fabricated from molds produced from actual ledge-stone rocks in order to produce a very natural appearance. There are 4 different size units in this series that are available in multiple colors. Most are stocked for immediate shipment. Price typically includes shipping. Go to our website to download the specifications and call us for the price list. Custom variations also available.

FACTORY FABRICATED GROTTOS

Replications Unlimited is one of the few companies that specializes in fabricating factory built grotto designs that are usually used for swim out areas and covering built in spas. We can design them with and without waterslides.

They are built with a lightweight but strong internal steel structure, with the plumbing built into the feature for easy installation, colored with a high performance polyurethane coating and shipped in one or multiple sections depending on size.

Smaller units can be installed in less than a day by the pool builder. Our installation staff will assist in the installation of larger more complex designs and installation is typically 2- 3 days.

See the website for more details and we if you send us your pool design we can provide some design concepts to present to your customer.

www.replicationsunlimited.com

A new dry stacked Chilton Stone veneer can be used on retaining walls, around pool equipment screening and on vanishing edge overflow walls. The stone veneer does not have the leaching problems of real stone or breakdown of grout. The panels are produced in a rigid and semi-rigid versions for flat and contoured walls. It allows the pool contractor to install the panels instead of subbing for a stone masonry contractor. Panels are available in 4' x 8' and 4' x 16' sizes.

The coloring system utilized is based on polyurethane coatings which has outstanding chemical and UV resistance. Send us your design and we will assist in determining the panels layout and costing details.
