

REPLICATIONS UNLIMITED

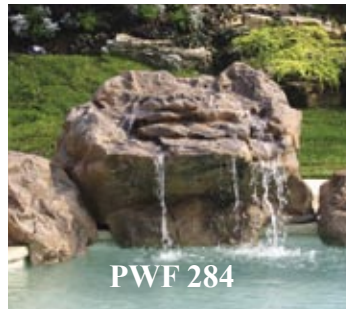

POOL NEWSLETTER: 2006 VOLUME TWO

NATIONWIDE MARKETING PROGRAM

The adjacent ad is part of the new Blue Haven nationwide marketing program. This photograph happens to have water features produced by Replications Unlimited.

Since pool customers are increasingly requesting water features to be part of new pools and may ask about the ones in the ad - we would like to assist your company in being prepared answering their questions.

NEW PRODUCTS FOR 2006

In the past, Replications Unlimited has offered a series of waterfalls, deck rocks, and landscape rocks to create a natural feeling around the pool. This year we have developed four new items that will further complete our goal of blending our existing waterfalls into the background of a customers pool. First, we added two bases for the Hawaiian (a unit for a concave curve and a unit for a straight area) These units raise the Hawaiian waterfall to 40 inches in height and provide a more picturesque feature.

Secondly, we developed two very large "transition rocks" that link the Hawaiian with the new base (PWF 287) and two of our additional waterfeatures (PWF 285 Aruba Falls and PWF 283 Martinique Falls).
